Introduction:

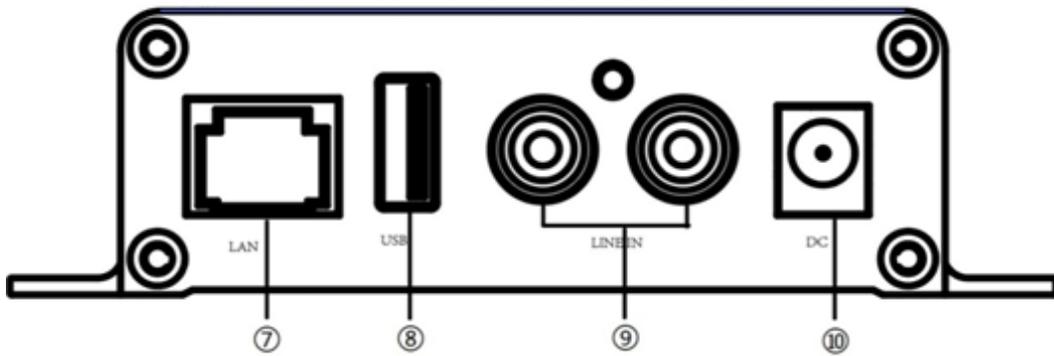

RAKOSO X10 is an innovative WiFi audio streamer that will turn your current speakers, amplifiers and soundbars into a Wireless Multiroom Sound System. The specialized iOS and Android applications, which are available on App store and Google Play, offer nice and easy Wireless Multiroom Sound System setting up. The friendly playback will allow you to stream different music to different zones or the same music to all zones in sync. You can choose the music from online streaming services like Spotify, TuneIn, iHeartRadio, Tidal and etc, the music from cell phone/Pad storage, USB flash drive, NAS and those services that support DLNA and UPNP.

Enjoy your fantastic music journey!

Interface and Functions

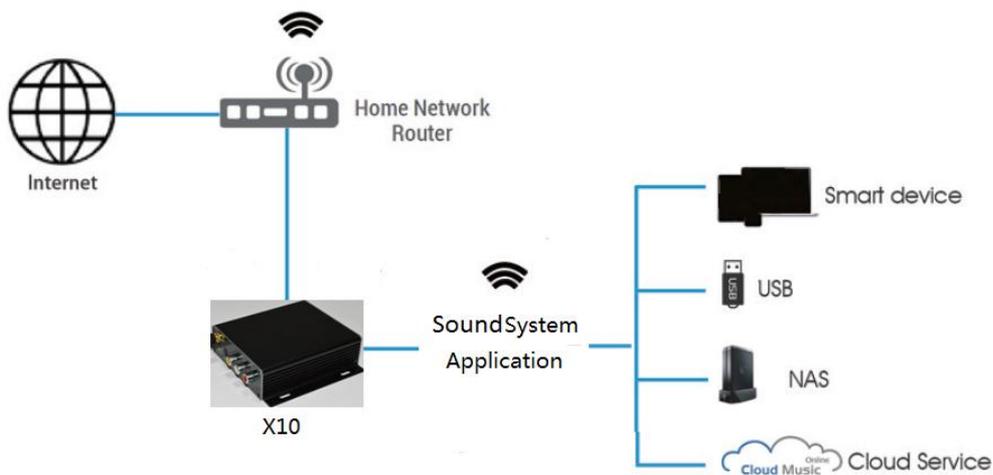

- ① WiFi Antenna: Used to WiFi connection
- ② Reset: Used to reset the device when it has problem in WiFi connection
- ③ LED: Indicates the status of the device
 - White blink: Network Connecting
 - White solid: Power on, Network connected, WiFi and USB streaming
 - Green solid: Line in streaming
- ④ Optical: Used to provide digital output to other device such as amplifiers
- ⑤ Coaxial: Used to provide coaxial output to other device such as amplifiers
- ⑥ Line out: Used to provide analog to other source receivers

- ⑦ Network connector: RJ45 used to connect to wired Ethernet network
- ⑧ USB input: Used to connect local storage devices
- ⑨ Line input: Analog input used to connect audio devices with RCA cable
- ⑩ Power input: Used to connect the power adaptor

How it works

Main features:

- Hi-res decoding up to 24bit 192kHz;
- Sleep Timer;
- App languages: English, Spanish, German, French, Italian, Dutch, Japanese, Korean, Portuguese, Traditional Chinese and Simplified Chinese...
- RCA analog input and output;
- SPDIF and Coaxial output;
- USB input
- LAN multiroom

Specifications

Connectivity	Wireless network	IEEE802.11 b/g/n 2.4G
	LAN	single 10/100M RJ45
Power supply		DC 5.5 V-1A input
Audio Output	RCA Analog	
	SPDIF	
	Coaxial	
Audio Input	USB input	
	RCA analog	
Frequency	20Hz-20KHz	
DAC	ESS 9023	
THD	0.009%	
SNR	90dB	
Audio decoding	24bit/192kHZ	
Speed(Max)	150M	
Streaming protocol	Airplay/DLNA/Spotify connect/ Qplay	
WiFi Multi-room	Yes	
LAN Multi-room	Yes	
Music Format	FLAC/AAC+/ALAC/MP3/APE/WAV	
Dimensions:	3.9" L x 4.1" W x 1.1" H(9.9x10.4x2.8CM)	
Weight	0.4 Lbs(181g)	

Multi-Room Streaming Graphic Illustration:

To play music the same music to different zones in sync from cell phone memory/NAS/online music services...

Configuration (see manuals for detailed introduction)

Option 1- Configuration via App

- Connect your mobile devices to your network.
- Open the application> press Add Device(+)>choose settings> choose the SoundSystem_xxxx hotspot> after connected, press the 'turn back' on your WLAN settings> the app will jump to the configuration step>choose the 2.4G network and enter the password>wait for the device to be configured.

Option 2- Configuration via Web Console

- 1. Power the device.
- 2. Choose the hotspot(SoundSystem_xxxx) in the WiFi setting on your cell phone or computer and connect.
- 3. Open the browser and enter 10.10.10.254 in the address bar.
- 4. Go for WiFi>choose you 2.4G router>enter the password> click "connect"> wait for the device to be configured.

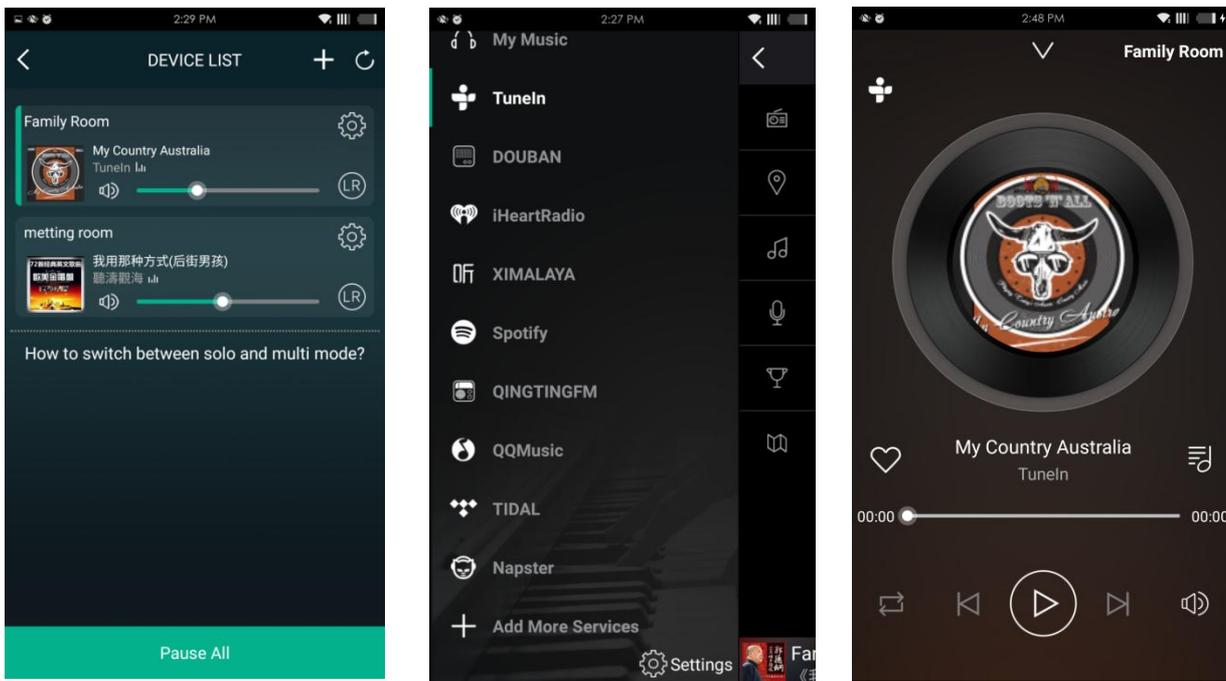

Option 3- Configuration via LAN

- Power the device
- Plug in the wired cable to the RJ45 Ethernet, the device will show on the app in about 10 seconds.

App Photo Gallery:

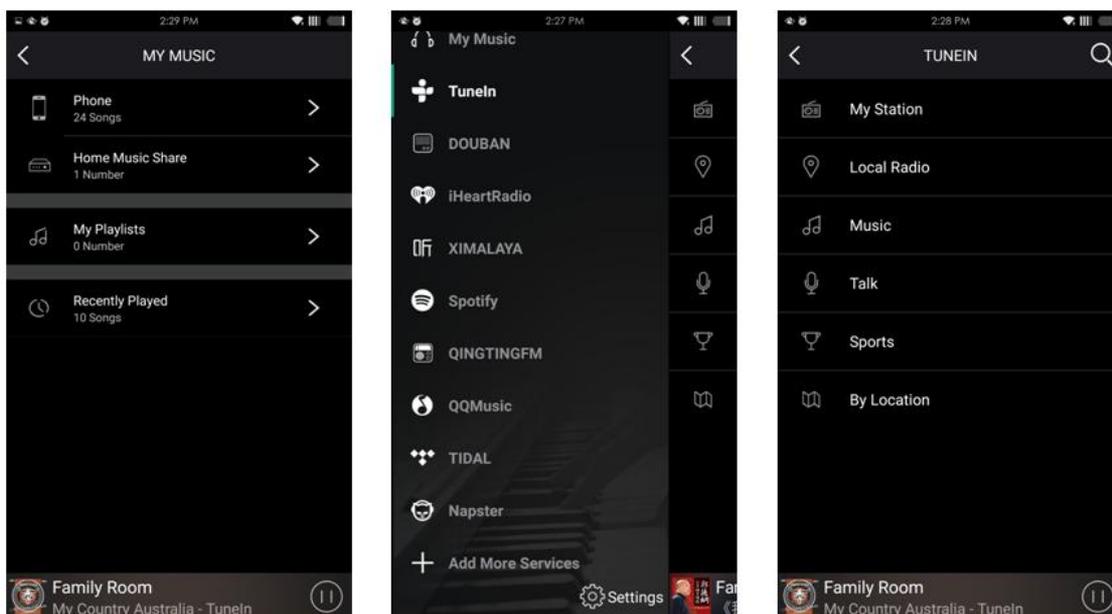

Playback

Your Device List will show all available zones. Press a zone to see the information on the current source. While on the view for the source, swipe right to reveal the available sources. From there, you can select what source you want to hear next, or swipe left to return to the currently playing source.

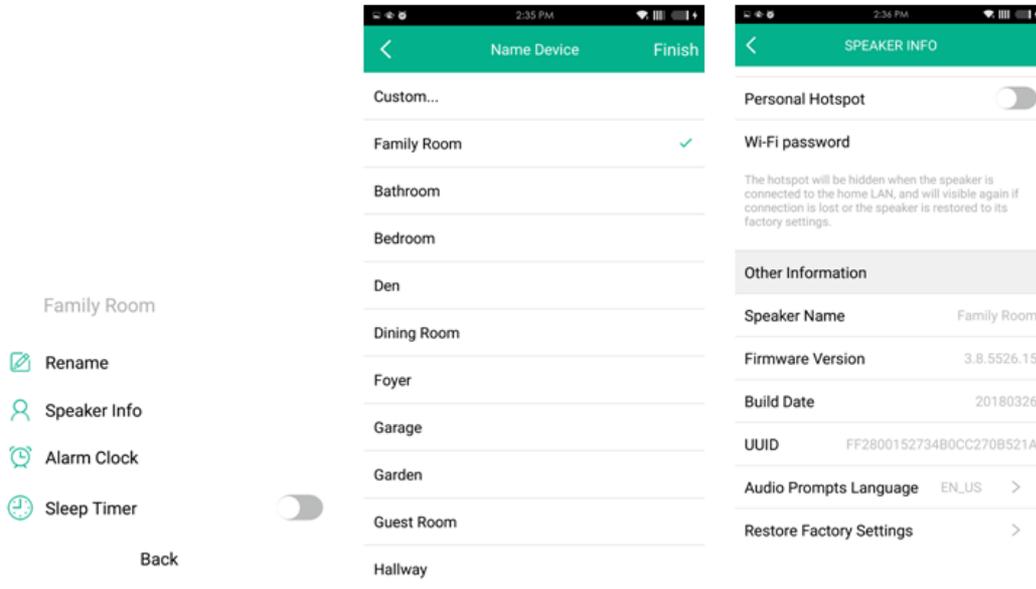

Streaming from Cell phone memory/NAS/Online Music Services

These screens let you access your available music, whether it be hard files on your network or connected to your a-live hardware, or what streaming options you've selected to be available.

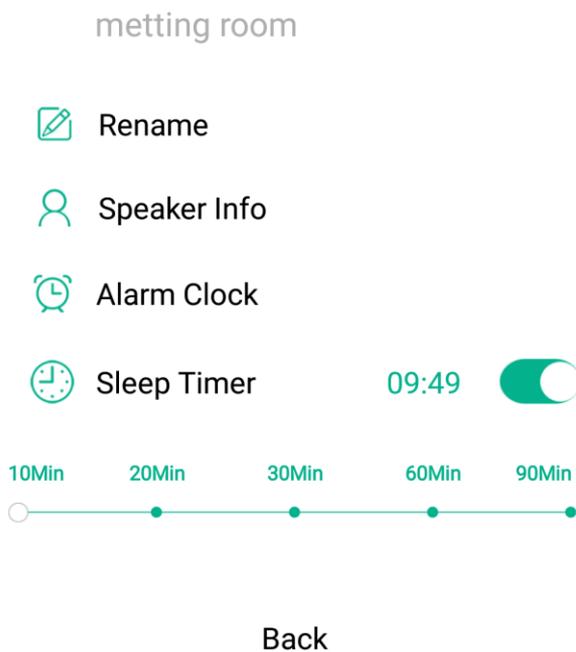

Device Settings:

Through device settings you can set an alarm clock or sleep timer, get technical information on your speaker, or rename it.

Sleep timer: 10mins/20mins/30mins/60mins/90mins Count Down option
